OUTDOOR LIVING**

WHY CHOOSE **ARTIFICIAL GRASS**

They call Australia the “Lucky Country” for a reason! We have the perfect climate, beautiful beaches, and a great outdoor culture. All the more reason to head outdoors!

Most house-proud folk have one thing in common – the desire to own soft, luscious, green grass to play on, to admire and to show off! Unfortunately, our warm climate often makes this difficult!

Keeping natural grass in good condition is not only tricky, but also costly. Expensive water bills, fertiliser and time-consuming maintenance are just a handful of reasons why artificial grass is becoming an increasingly popular alternative in Australian yards.

The combination of our quality artificial grass and our unique installation process replicates a soft, springy and supportive characteristics of natural grass. It’s soft enough to lie on and tough enough to play on.

Australian Outdoor Living’s quality range of artificial grass is incredibly realistic, luscious and green, and best of all... looks great all year round!

THE BEST PART

What's not to love about artificial grass? With Australian Outdoor Living, you can enjoy low maintenance grass throughout both the cooler and warmer months, all whilst saving money on water and maintenance bills!

Imagine going away on holidays and coming back to a pristine yard, not much different to when you left. With artificial grass you'll no longer need to worry... no more mowing, watering or fertilising!

Environmentally-Friendly & Water Saving

Today, more and more Australian homeowners are beginning to think about water usage and the environmental impacts of owning natural grass in their outdoor areas. Artificial grass requires no watering or fertilising, therefore dramatically lessening your water bill and impact on the environment. It's a win-win!

Child, Pet & Allergy Friendly

Artificial grass is a great solution for allergy sufferers and our whole range is 100% lead free. Each and every member of your family will love Australian Outdoor Living's artificial grass - including your pets!

UV Resistant & Fade Protection

UV can be one of the greatest threats to artificial grass. If your grass is not properly protected, you risk the bristles disintegrating, the grass changing colour and/or fading over time.

At Australian Outdoor Living, our artificial grass is UV and fade resistant. Our grass stands the test of time and is guaranteed for up to 7 years. Now that's peace of mind!

No Harsh Chemicals & Lead-Free

Natural grass requires both strong fertilisers and harsh weed killing chemicals to keep it looking good. Those chemicals may include allergens and carcinogens which are not only harmful for the environment, but for us too. Our artificial grass is lead free and contains no hazardous chemicals, so it's better for you and your family.

Low Maintenance

Artificial grass is perfect for people who desire exceptionally low maintenance grass. With such busy lifestyles, weekends are now more precious than ever. Reclaim those lovely days off by installing Australian Outdoor Living's artificial grass and enjoy the perks of no mowing, no edging and no unpleasant smells from fertilising!

Unique Thatching

Our artificial grass is designed with a unique thatching fibre tufted into the base of the grass. Containing both green and brown thatching, it looks and feels like natural grass. With 3 pile heights on offer, there's something to suit everyone!

OUR ARTIFICIAL GRASS RANGE

Australian Outdoor Living Augusta 35 Range

Australian Outdoor Living's August 35 Range is an impressively realistic looking artificial grass with brown curly thatching and the tallest pile height offered.

Australian Outdoor Living Savannah Broad Leaf Range

Our Savannah Broad Leaf Range is designed with a wider blade and olive/brown curly thatching. This grass boasts the highest pile density of our 3 ranges.

Australian Outdoor Living Fairway Range

Built to last, the Fairway Range is specifically suited for playgrounds and areas with very high traffic.

WHY CHOOSE AUSTRALIAN OUTDOOR LIVING?

At Australian Outdoor Living, we are passionate about helping Australians transform their outdoor areas. We set new standards of excellence and innovation in outdoor living solutions.

We are proud to be market leaders in our field. We take pride in what we do and we don't compromise on quality. Choose us for a free, no obligation measure and quote today!

ARTIFICIAL GRASS INSTALLATION

Our artificial grass is professionally installed by our fully qualified installation teams who are dedicated, experienced and take great pride in what they do. Attention to detail is what Australian Outdoor Living is all about, so you can be sure there are no cutting corners.

1. Preparation

The area will be dug out to approximately 50mm - 100mm (depending on the soil and grass type) in preparation for special base material. Depending on the above, this may be completed by hand or may require the expertise of a mini excavator operator.

2. Levelling

The entire area is to be completely levelled in preparation for base materials.

3. New Base

The base is spread across the entire area, levelled and dampened in preparation for compacting.

4. Compacting Base

The base is then machine compacted to ensure foundation integrity. All edging is hand packed for additional support and strength.

5. Roll, Trim & Join

Your grass is rolled out across the area, being careful to ensure that each strip faces the same direction. Each sheet is strategically placed to minimise joins then trimmed to size. After, each join is reinforced with a unique rubber strap to ensure no movement. If required, we will also pin the grass.

6. Defibrillation

Australian Outdoor Living has developed a unique machine defibrillation process to ensure the grass pile is raised and consistent throughout the entire area. This is critical to ensure your grass looks perfectly manicured.

7. Edging

All edges are hand scribed and edged to ensure that a natural look is given to the existing edging.

8. Inspection & Clean Up

Our professional installers provide a final once over inspection, sweep the area for loose sand and granulated rubber, ensuring nothing but a perfectly manicured grass is left behind.

9. Satisfaction Guarantee

We don't leave before ensuring our client's satisfaction, providing and explaining the guarantee and answering any questions.
