

The background of the entire page is a lush, green artificial lawn. In the bottom left corner, there is a dark grey paved area and a dense, low-lying green shrub.

ARTIFICIAL LAWN

AUSTRALIAN
OUTDOOR LIVING

lush &
green all
year round

Child & Pet Friendly Lawn

Given the term 'artificial', it is often assumed that artificial lawn is full of chemicals. At Australian Outdoor Living, this is absolutely not the case. You can sleep easy knowing that our artificial lawn is chemical and heavy metal free, making it 100% safe for both children and pets.

Low Maintenance Lawn

Australian Outdoor Living's artificial lawn never needs mowing, watering or edging - saving you water, time, money and hassle. Greener than natural lawn without the elbow-grease!

Lush & Green All Year

Cushy, soft underfoot, and gloriously green, our artificial lawn always retains its colour and integrity. That means beautiful lawn all year round, guaranteed to last for years to come.

OUR QUALITY COMPONENTS

At Australian Outdoor Living, there are a number of specifically designed products and unique methods we employ to ensure our artificial lawn looks and performs at it's best.

Thatching

Our artificial lawn is designed with the thatching fibre tufted into the base. When installed, we spread a sand infill which is fibrillated through the whole sub-surface area. This helps the Lawn to replicate both the springy and supportive characteristics of natural grass and ensures our artificial lawn keeps its shape and tolerates heavy traffic, while always remaining soft and lush underfoot.

Substrate

Our substrate comprises of crushed rock with excellent drainage properties. This makes for a fantastic base for Australian Outdoor Living's artificial lawn as it is easily spread to any given area, and yet compacts to a hard firm base when whacked. Extensively used in the building industry, crushed rock/dust provides a long lasting base for your artificial lawn.

Kiln Dried Sand

Kiln dried sand is a fine sand with a maximum granular diameter of 1mm. Kiln dried, is an excellent sand for use on artificial lawn as it is easily spread and fibrillated. This sand differs from other sand as it doesn't contain any small rocks, therefore providing a nicer feel underfoot, whilst also weighing down the lawn. This also helps to keep the lawn blades standing upright.

Kiln Dried Sand

- Adds stability preventing wrinkles and folds
- Ensures lawn blades remain erect

Artificial Lawn

- Up to 7 year warranty
- Metal free with no harmful chemicals
- UV resistant and flammability tested
- High grade backing prevents blade loss and degradation
- Drainage holes for quick water disposal
- FIFA certified slip prevention

Substrate

- 50mm premium substrate compound
- Levelled and compacted

Earth

- Excavated

Nails and Pins

- Seams and edges are secured with nails and pins Galvanised for longevity

OUR QUALITY ARTIFICIAL LAWN

Artificial lawn is becoming an increasingly popular alternative to natural lawn. Having come a long way since its green carpet-like appearance, these days it's hard to tell the difference! For exceptionally realistic looking lawn, look no further than Australian Outdoor Living's premium range of durable artificial lawns.

Allergy Free

Rye grass and dust are two of the main culprits of that annoying spring and summer hayfever - unfortunately they can be nearly impossible to control in your garden. With artificial lawn from Australian Outdoor Living, there's minimal dust and weeds - that means less nasty allergies from your yard!

No Harsh Chemicals & Heavy Metals

Natural lawn requires both strong fertilisers and harsh weed killing chemicals to keep them looking good. Those chemicals may include allergens and carcinogens which are not only harmful for the environment, but for us too. Comparatively, our artificial lawn is heavy metal free and contains no hazardous chemicals, so it's better for you and your family.

UV Resistant & Fade Protection

UV is the single greatest threat to artificial lawn. If yours is not properly protected, you run the risk of the bristles disintegrating and the lawn changing colour or fading over time. At Australian Outdoor Living we back our range with up to 7 years limited product guarantee. Really though, you can expect your lawn to be looking fantastic for many more years to come.

Augusta

Australian Outdoor Living's Augusta variety is an impressively realistic artificial lawn, with brown curly thatching and a medium pile height offered.

Savannah Broad Leaf

Our premium Savannah Broad Leaf variety is designed with a wider blade and olive/brown curly thatching. This lawn boasts the highest pile density, height, and widest blade width within our 4 ranges.

Fairway

The Fairway variety is specifically suited for playgrounds and lawn with very high traffic.

MultiSport

Our MultiSport range is perfect for those with an active family. It's great for mini golf, cricket, lawn bowls and any other sport you might want to play in your backyard. It can also be adapted for commercial use.
