Wafer

Please Note: Whilst every effort has been made to have our available colours displayed / pictured as accurately as possible, these images are to be used as an indication only.

CLASSIC RANGE

Simplistic and elegant, our Classic outdoor blinds are easily our most popular.

Fits Difficult Spaces

With no need for side posts, the classic blind is the ideal solution for difficult or uneven spaces.

Easy Operation

Enjoy a simple manually operated system with no unsightly pulleys or ropes.

Tension Control

The crank operation allows you to control the tension of the blind ensuring it remains looking better for longer.

SMARTTRACK RANGE

Our range of SmartTrack outdoor blinds is the latest in blinds innovation. Choose from a selection of three unique ways to operate your blinds, and experience the very best in blinds technology.

AVAILABLE IN 3 OPTIONS TO SUIT YOUR HOME

SmartTrack Signature

The SmartTrack Signature range is simple and easy to use. Combining the simplicity of a manually operated system with a track blind system. SmartTrack Signature gives you a completely enclosed solution, perfect for better protection from the weather and insects.

SmartTrack Power

The SmartTrack Power series offers all the benefits of the Signature series, with the added bonus of remote control operation. Featuring an advanced motor, 15 configurable channels, a larger blind span and having undergone extensive product testing, the SmartTrack range will bring your home into the 21st century.

SmartTrack Connect

With a Wi-Fi bridge, the SmartTrack Connect is a fully automated operation system. The WiFi bridge seamlessly connects your blinds to your phone and home automation system meaning you can have even more control, from anywhere in or outside your home.

SMARTTRACK CONNECT - THE FUTURE OF OUTDOOR BLINDS

App Connectivity

Download a user-friendly smartphone application, and operate your blinds from anywhere with a Wi-Fi connection. This gives you the ability to raise and lower your blinds, wherever you may be.

Bidirectional Communication

The Bidirectional Communication allows you to see the exact height of your blinds in real time, via the app. You can remotely adjust the blinds to your desired level, say for an unexpected afternoon rain storm.

Home Automation Connectivity

SmartTrack Connect allows you to control your blinds through voice with Smart Home Systems such as Google Home or Amazon Alexa. Set your preferred scene and sit back and relax as your blinds do the rest.

Automate YOUR Settings USING THE APP

Set the scene in your home at specific times by programming your preferred 'time of day' settings using the SmartTrack smartphone app. Limited only by your imagination, the possibilities are endless.

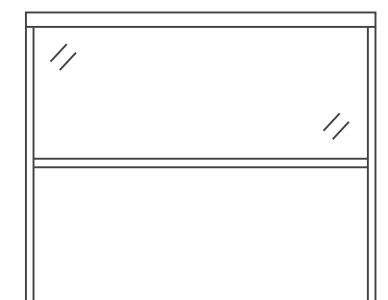

Sunrise Setting | 7am

Set your blinds to open and let in natural morning light.

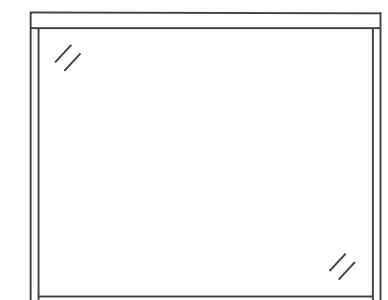

Afternoon Setting | 3pm

Lower blinds to half way and block out the blinding glare.

Party Setting | 9pm

Lower blinds to keep in the warmth and keep the bugs out.

Bringing backyard dreams to life
